Walk thru at Highland – The committee walked through the various areas of the building, highlighting the kitchen, boiler room, and the upstairs newly renovated rooms, reviewing the effects the water leaks have had on the building.

Overall, the committee was pleased with the work that had been completed. Tom, Jason, and Joe answered several questions from the committee members.

In addition to the walk thru, the committee discussed having a staff for weekends only, relieving the full time staff from covering those hours.

Notes taken during the meeting asking for improvements was sent to the day foreman, VP of maintenance, and the District Facilities Director.
