

MINDING YOUR **Mi**ND

This will be part of our District Mental Health Awareness Event.

The goal is to educate teachers, parents and community members on Mental Health Issues that our teens may be suffering from.

Just Talk About It is an opportunity for adults to be educated on the signs and symptoms of a mental health issue, providing knowledge to act before a crisis hits. This 90-minute program opens with a Minding Your Mind clinician discussing the signs and symptoms of the mental health issues most prevalent in adolescents through young adulthood, and to know the difference from typical teenage behavior.

Then a Young Adult Speaker addresses the audience adding a real-life story that illustrates the information that the clinician speaks about, transforming it all into relatable experiences.
