

FACILITY IMPROVEMENTS

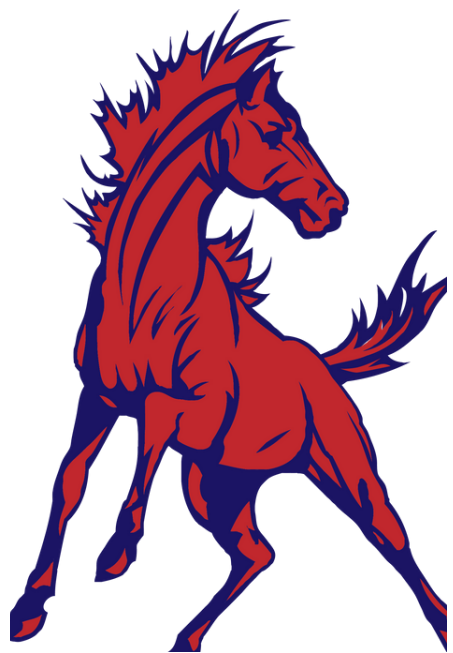

2013-2022

Replaced the entire roof and the boilers. Added second floor HVAC. Installed all new windows and exterior doors. Replaced the school stadium. Upgraded maintenance garage. Replaced 1st floor school lockers. Renovated Athletic Trainer's room, two locker rooms, two athletic locker-rooms, a science laboratory, the library media center, two engineering labs, and created a dance studio, exercise studio, and ROTC room. We also installed LED lighting inside and outside of the school, and added irrigation, field scoreboards, and softball dugouts. Most recently, we renovated our instrumental music classroom, the PA system, HVAC controls, electric generator, main gym floor, paint, and sound system, added a security vestibule, and built an outside cafeteria seating area and veteran's memorial.

Created a new dance studio. Seal-coated all parking surfaces. Installed 15-20 year warranty roof covering. Replaced concession stand roof, replaced the track, upgraded to LED lighting, installed an organic garden space, and improved HVAC control system. We added a security vestibule, created an outside bathroom facility, and corrected drainage issues around E corridor.

Installed HVAC units in the cafeteria, "S", and "B" hallways. Created a new food education classroom and dance studio. We replaced the entire roof, replaced the boilers, and added solar power. We renovated parking and concrete surfaces, the library media center, a science laboratory, an engineering laboratory, an outside bathroom facility, and upgraded to LED lighting. We added a security vestibule, a new cafeteria floor, Cappelli Courtyard, auditorium lighting, and an ADA lift near the auditorium.

Created the Center for Alternative and Restorative Education [C.A.R.E.] at Camden County College. Moved our Job Transition II Program to Camden County College. This allowed our students to experience a college campus and opened doors for more job flexibility.
