# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21^{\text {ST }}$ CENTURY GLOBAL SKILLS 

## Course Name: Algebra 2 Integrated

Course Number: 033300

## PART I: UNIT RATIONALE

WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 Integrated/Geometry <br> Chapter 4: Transformations | Unit Summary: <br> In this unit, students will perform translations with vectors and Algebra. They will reflect figures in a given line, rotate figures about a point, identify line and |
| :---: | :---: |
| $\begin{aligned} & \text { Grade Level(s): } \\ & 11-12 \end{aligned}$ |  |
| Essential Question(s): <br> - How do you translate a figure using a vector? <br> - How do you reflect a figure in the line $y=x$ ? <br> - How do you rotate a figure 900, 180o or 2700 about the origin? <br> - What is a glide reflection? <br> - When does a figure have line symmetry? | Enduring Understanding(s): <br> Students will be able to: <br> - Use a vector to translate a figure. <br> - Reflect a figure in any given line. <br> - Rotate figures about a point. <br> - Perform combinations of two or more transformations. <br> - Identify line and rotational symmetries of a figure. <br> - Use drawing to draw dilations. |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES

## DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1. Experiment with transformations in the plane.

- Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g.l translation versus horizontal stretch).
- Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments.
- Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometric software. Specify a sequence of transformations that will carry a given figure onto another.

2. Perform operations with vectors.

- Recognize vector quantities as having both magnitude and direction. Represent vector quantities by directed line segments, and use appropriate symbols for vectors and their magnitudes (e.g., v, |v|, ||v||, v).

3. Understand similarity in terms of similarity transformations

- Verify experimentally the properties of dilations given by a center and a scale factor:
a. A dilation takes a line not passing through the center of the dilation to a parallel line, and leaves a line passing through the center unchanged.
b. The dilation of a line segment is longer or shorter in the ratio given by the scale factor.
- Given two figures, use the definition of similarity in terms of similarity transformations to decide if they are similar; explain using similarity transformations the meaning of similarity for triangles as the equality of all corresponding pairs of angles and the proportionality of all corresponding pairs of sides.

NJSLS:

1. NJSLS-G-CO.A.2, NJSLS-G-CO.A.4, NJSLS-G-CO.A. 5
2. NJSLS-N-VM.A. 1
3. NJSLS-G-SRT.A.1.a, NJSLS-G-SRT.A.1.b, NJSLS-G-SRT.A. 2

## Cross-Curricular Standards:

Realworld problem-solving
examples

1. Finding a Minimum
Distance- Shopping (p. 185)

## Learning Target

1. Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.

## NJSLS:

1. SCI.HS-ETS1-2
2. SCI.HS-ETS1-2
3. Finding a Minimum
Distance - Delivery (p. 187)
4. Finding the Length of an
Image (p.211)
5. Finding a Minimum Distance - Delivery (p. 187)
6. Finding the Length of an Image (p.211)
7. Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
8. Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
9. SCI.HS-ETS1-2

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:
$21{ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills

## Mathematical Practices:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

## Students will engage with the following text:

## Text:

- Geometry, A Common Core Curriculum- Big Ideas Math, Big Ideas Learning LLC, 2019

Online resources incorporated through the year, including but not limited to:

- BigideasMath.com- publisher online assignments, resources, and text
- Desmos- online graphing tool
- G Suite for Education- Google Classroom, Docs, Drive, Mail, etc.
- NJGPA formula sheet

## Calculators:

TI-84 Plus graphing calculator

## Students will write:

Students will define and compare/contrast given terms. Students will describe and write about a diagram using mathematical language. Students will relate real world situations using geometry terminology. Students will also prove postulates and theorems.

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Opportunities for developing students' understanding in this chapter include: investigating geometry activities, problem solving workshops, modeling examples, using real-life application and construction of models or other hands-on activities such as projects. Technology such as animated geometry, Smart Board, graphing calculators, and Geometer's Sketchpad will also be explored through the learning experience. Other interests could include, but are not limited to alternative lesson openers, using note taking strategies, math and history applications, and interdisciplinary applications.

Suggested warm-up activities, instructional strategies/activities and assignments:

### 4.1 Translations:

| Warm-up/Starting Options | Explorations p. 173, NJSLA-M problems |
| :--- | :--- |
| Practice and Apply | p. 178 \#11-25 odd |
| Resources | Online Dynamic Classroom has all resources. <br> Review: Practice A, Practice B, Puzzle Time, Student <br> Journal, and Skills Review Handbook <br> Advanced: Enrichment and Extension, Cumulative <br> Review <br> NJSLA-M resources |

Section 4.2 Reflections:

| Warm-up/Starting Options | Explorations p. 181, NJSLA-M problems |
| :--- | :--- |
| Practice and Apply | p. 186 \#2-6, 7-19 odd |
| Resources | Online Dynamic Classroom has all resources |
| available. |  |
| Review: Practice A and Practice B, Puzzle Time, |  |
| Student Journal, and Skills Review Handbook |  |
| Advanced: Enrichment and Extension, Cumulative |  |
| Review |  |
| NJSLA-M problems |  |

Section 4.3 Rotations:

| Warm-up/Starting Options | Explorations p. 189, NJSLA-M problems |
| :--- | :--- |
| Practice and Apply | p. 194 \#7-15 odd, 28 |
| Resources | Online Dynamic Classroom has all resources |
|  | available. |

|  | Review: Practice A and Practice B, Puzzle Time, <br> Student Journal, and Skills Review Handbook <br> Advanced: Enrichment and Extension, Cumulative <br> Review <br> STEM Video and Performance Task: Rotational <br> Doors |
| :--- | :--- |
| Section 4.5 Dilations: | Explorations p. 207, NJSLA-M problems | | Warm-up/Starting Options | p. 212 \# 3, 5, 15-21 odd, 25, 29 |
| :--- | :--- |

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

## Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, warm-up/exit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition, and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Algebra 2 Integrated curriculum/syllabus at the conclusion of an instructional time period:

- Diagnostic Pre-Test
- Chapter Assessments
- Periodic Benchmark Assessments
- End of Course Assessments
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

The following assessments require students to utilize various strands of mathematics:

- Projects
- Performance Tasks
- Homework
- Classwork

## Accommodations/Modifications:

## As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

Course Name: Algebra 2 Integrated
Course Number: 033300

PART I: UNIT RATIONALE
WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: | Unit Summary: <br> Algebra 2 <br> Integrated/Geometry <br> Chapter 11: Circumference, <br> Area, and Volume |
| :--- | :--- |
| the measurement of solids. Students, will come to this chapter with knowledge |  |
| of many formulas for surface area and volume. These will be reviewed and new |  |
| formulas will be added. Different from middle school is that students now have |  |
| Grade Level(s): | a greater ability to solve equations. In this chapter, students will do additional |
| work with circles involving arc length and area of sectors. Students will also find |  |
| the area of regular polygons. |  |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1. Find surface area of geometric shapes.

- Identify the shapes of two-dimensional cross-sections of the three-dimensional objects, and identify three-dimensional objects generated by rotations of twodimensional objects.
- Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone.
- Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk as a cylinder).

2. Find the volume of geometric shapes.

- Identify the shapes of two-dimensional cross-sections of three dimensional objects, and identify three-dimensional objects generated by rotations of twodimensional objects.
- Give an informal argument for the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid and cone.
- Give an informal argument using Cavalieri's principle for the formulas for the volume of a sphere and other solid figures.
- Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.
- Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk as a cylinder).

NJSLS:

1. NJSLS-G-GMD.B.4, NJSLS-G-GMD.A.1, NJSLS.G-MG.A. 1
2. NJSLS.G-GMD.B.4, NJSLS.G-GMD.A.1, NJSLS.G-GMD.A.2, NJSLS-G.GMD.A.3, NJSLS-G.MG.A. 1

## Cross-Curricular Standards:

| Realworld problem-solving <br> examples | $\underline{\text { Learning Target }}$ | $\underline{\text { NJSLS: }}$ |
| :--- | :--- | :--- |
| 1. Using Circumference to <br> Find Distance Traveled <br> (p.596) | 1. Process data and report results. | 1. TECH.8.1.12.E.CS4 |
| 2. Estimate Earth's <br> Circumference (p. 599) | 2. Analyze and interpret data to determine scale <br> properties of objects in the solar system. | 2. SCI.MS-ESS1-3 |
| 3. Population Density (p. <br> 603) | 3. Construct an argument supported by empirical <br> evidence that changes to physical or biological <br> components of an ecosystem affect populations. | 3. SCI.MS-LS2-4 |

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

## 21 ${ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills

# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21{ }^{\text {ST }}$ Century global skills 

Course Name: Algebra 2 Integrated
Course Number: 033300

PART I: UNIT RATIONALE
WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 Integrated/ <br> Geometry Ch 9: <br> Right Triangles and <br> Trigonometry | Unit Summary: <br> In this unit, students will be introduced to right triangle trigonometry. The first lesson on the Pythagorean Theorem will not be completely new to students who will have familiarity with this theorem from idle school. The next three lessons present the tangent, sine, and cosine ratios. The focus of these lessons is to solve for parts of a right triangle. Many real-life applications are presented. |
| :---: | :---: |
| $\begin{aligned} & \text { Grade Level(s): } \\ & 11-12 \end{aligned}$ |  |
| Essential Question(s): <br> - How can you prove the Pythagorean Theorem? <br> - How is a right triangle used to find the sine, cosine, and tangent of an acute triangle? <br> - When you know the lengths of the sides of a right triangle, how can you find the measures of the two acute angles? | Enduring Understanding(s): <br> Students will be able to: <br> - Find side lengths in right triangles <br> - Use relationships among the sides in special right triangles <br> - To use trigonometric ratios to solve for side lengths in right triangles <br> - Use inverse tangent, sine, and cosine ratios |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1. Use relationships among the sides in special right triangles.

- Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.
- Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).

2. Use trigonometry to solve right triangles.

- Understand that by similarity, side ratios in right triangles are properties of the angles in the triangle, leading to definitions of trigonometric ratios for acute angles.
- Explain and use the relationship between the sine and cosine of complementary angles.
- Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.
- Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).
- Apply geometric methods to solve design problems (e.g., designing an object or structure to satisfy physical constraints or minimize cost; working with typographic grid systems based on ratios).

## NJSLS:

1. NJSLS.G-SRT.C.8, NJSLS.G-MG.A. 1
2. NJSLS.G-SRT.C.6, NJSLS.G-SRT.C.7, NJSLS.G-SRT.C.8, NJSLS.G-MG.A.1, NJSLS. G-MG.A.3, NJSLS. G-SRT.D. 10

## Cross-Curricular Standards:

| Realworld problem-solving <br> examples | Learning Target <br> 1. Moon Craters (p. 491) | 1. Analyze and interpret data to determine scale <br> properties of objects in the solar system. |
| :--- | :--- | :--- |
| 2. Sonar Systems (p. 500) | 2. Plan an investigation to provide evidence that the <br> change in an object's motion depends on the sum of the <br> forces on the object and the mass of the object. | 2. SCI.MS-PS2-2 |
| 3. Altitude (p. 497) | 3. Plan an investigation to provide evidence that the <br> change in an object's motion depends on the sum of the <br> forces on the object and the mass of the object. | 3. SCI.MS-PS2-2 |

## The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

## 21 ${ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1.4 Solving Linear Systems

Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context.

Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.

### 3.5 Solving Nonlinear Systems

Represent constraints by equations or inequalities, and by systems of equations and/or
inequalities, and interpret solutions as viable or nonviable options in a modeling context.

Solve quadratic equations with real coefficients that have complex solutions.

Explain why the $x$-coordinates of the points where the graphs of the equations $y=f(x)$ and $y=g(x)$ intersect are the solutions of the equation $f(x)=g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.

## NJSLS:

| :--- |
| productively. |

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

## $21{ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills

## Mathematical Practices:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

## Students will engage with the following text:

## Text:

- Algebra 2, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019

## Online Resources incorporated through the year, include but not limited to:

- BigldeasMath.com - publisher on-line assignments, resources and text
- Desmos - online graphing tool
- IXL - web-based software
- G Suite for education - Google Classroom, Docs, Drive, Mail, etc...
- For this chapter students will receive formula sheets to be used at the teacher's discretion on assignments and assessments.

## Calculators:

- TI-84 Plus graphing calculator

## Students will write:

Students will describe how can you determine the number of solutions of a linear system?
Given a system of three linear equations in three variables, students will explain how you would approach solving such a system.
Students will explain when it might be more convenient to use elimination method than then substitution method to solve a linear system.
How can you solve a nonlinear system of equations?

Would you prefer to use a graphical, numerical, or analytical approach to solve some given nonlinear system of equations? Explain your reasoning.

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Students will uncover and build skills through various classroom learning activities. Investigating algebra activities, modeling examples, using real-life application, using note-taking strategies, and using Smart Board technologies will all be explored as a blend of learning strategies to promote critical thinking, problem solving and performance skills of all learners. Other learning experiences could include alternative lesson openers, math and history applications, problem-solving workshops, interdisciplinary applications and projects.
Suggested warm-up activities, instructional strategies/activities, and assignments:

Supplement 2x2 Systems:

| Warmup/Starting Options | Warm-ups display a graph of two linear systems and <br> discuss what the intersection represents. |
| :--- | :--- |
| Practice and Apply | For objectives relating to system of two, teachers <br> should use Kuta or other supplementary materials. <br> Big Ideas Text pg. 28: \# 33-38 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, etc... |

### 1.4 Solving Linear Systems

| Warmup/Starting Options | Warm-ups are available in the Dynamic Classroom <br> Resource (rewriting equations in slope-intercept form) |
| :--- | :--- |
| Practice and Apply | For objectives relating to system of two, teachers <br> should use Kuta or other supplementary materials. <br> Big Ideas Text pg. 34: 1, 3-6, 17 <br> Supplemental Text Prentice Hall Algebra 2: pg. 157 \#1- <br> 21 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, etc... |

### 3.5 Solving Nonlinear Systems:

| Warmup/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource. Solve a system using a graphing calculator <br> or software. |
| :--- | :--- |

| Practice and Apply | Big Ideas Text pg.136 \# 3-14 |
| :--- | :--- |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, etc... |

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

## Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, exit/admit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Algebra 1 curriculum/syllabus at the conclusion of an instructional time period.

- Diagnostic Pre-Test
- Chapter Tests
- Periodic Benchmark Tests
- End-Of -Course Assessment
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Performance Assessments:

The following assessments require students to utilize various strands of mathematics.

- Projects
- Performance Tasks
- Homework
- Classwork

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

Course Name: Algebra 2 Integrated
Course Number: 033300

PART I: UNIT RATIONALE
WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 Integrated/ <br>  <br> Quadratic Equations <br> Grade Level(s): 11-12 | Unit Summary: <br> The strategies for factoring quadratic expressions will be discovered. This includes factoring the greatest common factor, quadratic trinomials, special cases (perfect square trinomials and difference of two squares). Students will use their ability to factor quadratic expressions in order to solve quadratic expressions by factoring. |
| :---: | :---: |
| Essential Question(s): <br> - How do we factor by GCF, Difference of two squares and trinomials? <br> - How can you use the graph of a quadratic equation to determine the number of real solutions of the equation? | Enduring Understanding(s): <br> Students will be able to: <br> - Factor a variety of expressions by Greatest Common Factor, Difference of two squares as well as factoring trinomials with the following: (level CP = trinomial with being a prime number no larger than 3 and $c$ being prime or composite) <br> - Solve quadratic equations by graphing. <br> - Solve quadratic equations algebraically. <br> - Solve real-life problems. |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1. Supplemental Factoring Unit (Algebra 1 Textbook, Chapter 7)

- Use the structure of an expression to identify ways to rewrite it.
- Factor a quadratic expression to reveal the zeros of the function it defines.

2. Solve Quadratic Equations

- Use the structure of an expression to identify ways to rewrite it.
- Solve quadratic equations by inspection (e.g., for $x^{2}=49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm b i$ for real numbers $a$ and $b$.
- Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.

# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21^{\text {sT }}$ Century global skills 

Course Name: Algebra 2 Integrated
Course Number: 033300

## PART I: UNIT RATIONALE <br> WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: Algebra 2 Integrated, Algebra 2 Ch 2: Quadratic Functions | Unit Summary: <br> Students have previously studied solving quadratic functions algebraically in Algebra 1. Their background should include factoring quadratic expressions, graphing quadratic equations written in three forms, and solving quadratic |
| :---: | :---: |
| $\begin{aligned} & \text { Grade Level(s): } \\ & 11-12 \end{aligned}$ | equations using a variety of approaches. Students will extend their knowledge of quadratic functions in this chapter. In the previous chapter, students looked at the transformations of linear functions. The first lesson in this chapter introduces the same transformations on quadratic functions. The vertex of a quadratic function is a key point that helps students quickly distinguish the type(s) of transformation(s) displayed in a graph. <br> The second and third lessons look at characteristics of quadratic functions. Where is the function increasing or decreasing? Where is the line of symmetry? What is the maximum/ minimum value of the function? The last lesson of the chapter looks at modeling with quadratic functions. There are four common forms in which quadratics are written, and each gives information about the graph and the behavior of the function. Understanding the connection between the characteristics of a quadratic and its equation can help students apply their knowledge when working with a real-life application. |
| Essential Question(s): <br> - How do the constants <br> $a, h$, and $k$ affect the graph of the quadratic function $g(x)=a(x-h)^{2}+k$ ? <br> - What type of symmetry does the graph of $f(x)=a(x-h)^{2}+k$ have and how can you describe the symmetry? <br> - How can you use a quadratic function to model a real-life situation? | Enduring Understanding(s): <br> Students will be able to: <br> - Describe transformations of quadratic functions. <br> - Write transformations of quadratic functions. <br> - Explore properties of parabolas. <br> - Find maximum and minimum values of quadratic functions. <br> - Determine domain and range using interval notation. <br> - Determine intervals of increase and decrease using interval notation. <br> - Solve real-life problems <br> - Write equations of quadratic functions using vertices and points. |

PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES
DESCRIBE THE LEARNING TARGETS.
After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

### 2.1 Transformations OF Quadratic Functions

Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.
Identify the effect on the graph of replacing $f(x)$ by $f(x)+k, k f(x), f(k x)$, and $f(x+k)$ for specific values of $k$ (both positive and negative); find the value of $k$ given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. Include recognizing even and odd functions from their graphs and algebraic expressions for them.

### 2.2 Characteristics of Quadratic Functions

For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship.
For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship.
Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.

### 2.4 Modeling with Quadratic Functions

Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

## NJSLS:

1. NJSLS.F-IF.C.7c, NJSLS.F-BF.B. 3
2. NJSLS.F-IF.B.4, NJSLS.F-IF.C.7.c, NJSLS.F-IF.C.9, NJSLS.A-APR.B. 3
3. NJSLS.A.CED.A. 2

## Cross-Curricular Standards:

## Realworld problem-solving

 examples1. Life Science (p. 53)
2. Distance (p. 60)
3. Engineering (p. 62)

## Learning Target

1. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
2. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
3. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.

## NJSLS:

1. SCI.MS-PS2-2
2. SCI.MS-PS2-2
3. SCI.MS-PS2-2

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

21 ${ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills

## Mathematical Practices:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

## Students will engage with the following text:

## Text:

- Algebra 2, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019
- Algebra 1, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019
[Supplement with chapter 8 as needed]

## Online Resources incorporated through the year, include but not limited to:

- BigldeasMath.com - publisher on-line assignments, resources and text
- Desmos - online graphing tool
- IXL - web-based software
- G Suite for education - Google Classroom, Docs, Drive, Mail, etc...
- For this chapter students will receive formula sheets to be used at the teacher's discretion on assignments and assessments.

## Calculators:

- TI-84 Plus graphing calculator

## Students will write:

Students will describe the constants $\mathrm{a}, \mathrm{h}$, and k affect the graph of the quadratic function $\mathrm{g}(\mathrm{x})=\mathrm{a}(\mathrm{x}-\mathrm{h}) 2+\mathrm{k}$.
Students will write the equation of a quadratic function given a graph and explain their reasoning.
Students will describe what type of symmetry does the graph of $f(x)=a(x-h) 2+k$ have.
Students will describe the symmetry of each graph of a function given its equation.
Students will write the equation of a translated parabola.
Students will write an equation of a parabola using a vertex and a given point.

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Students will uncover and build skills through various classroom learning activities. Investigating algebra activities, modeling examples, using real-life application, using note-taking strategies, and using Smart Board technologies will all be explored as a blend of learning strategies to promote critical thinking, problem solving and performance skills of all learners. Other learning experiences could include alternative lesson openers, math and history applications, problem-solving workshops, interdisciplinary applications and projects.

2.4 Modeling with Quadratic Functions

| Warm up/Starting Options Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource <br> (write the equation of a line in point slope form given <br> a point and <br> the slope) <br> Practice and Apply Big Ideas Text pg. 80, \# 2, 4, 6, 17 <br> Supplemental Text: Prentice Hall Algebra 2 pg255: \#13  <br> -19  |  |
| :--- | :--- |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, <br> Textbook website platform, Desmos, etc... |

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

## Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, exit/admit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Algebra 1 curriculum/syllabus at the conclusion of an instructional time period.

- Diagnostic Pre-Test
- Chapter Tests
- Periodic Benchmark Tests
- End-Of -Course Assessment
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Performance Assessments:

The following assessments require students to utilize various strands of mathematics.

- Projects
- Performance Tasks
- Homework
- Classwork

Accommodations/Modifications:
As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21{ }^{\text {ST }}$ CENTURY GLOBAL SKILLS 

Course Name: Algebra 2 Integrated
Course Number: 033300

PART I: UNIT RATIONALE
WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 Integrated/ <br> Algebra 2 Ch 3: Completing <br> the Square \& Quadratic <br> Formula <br> Grade Level(s): <br> 11-12 | Unit Summary: <br> The strategies for solving quadratic equations will be continued in this unit. Students will learn the technique of completing the square so that the Quadratic Formula can be derived. In total, students will use five strategies for solving quadratic equations: graphing, square rooting, factoring, completing the square, and using the Quadratic Formula. As the number of strategies increases in the chapter, students should be making informed choices as to which strategy to use given the equation. |
| :---: | :---: |
| Essential Question(s): <br> - How can you complete the square for a quadratic expression? <br> - How can you derive the equation of a circle by completing the square? <br> - How can you derive a general formula for solving a quadratic equation? | Enduring Understanding(s): <br> Students will be able to: <br> - Solve quadratic equations using square roots. <br> - Solve quadratic equations by completing the square. <br> - Write the equation of a circle by completing the square. <br> - Write quadratic functions in vertex form. <br> - Solve quadratic equations using the Quadratic Formula. <br> - Solve real-life problems. |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

1. Simplify radicals. (Supplemental text)

- Use the structure of expressions and find ways to rewrite it.
- Factor a quadratic expression to reveal the zeros of the function it defines.

2. Complete the square.

- Use the structure of an expression to identify ways to rewrite it.
- Solve quadratic equations by inspection (e.g., for $x^{2}=49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm b i$ for real numbers $a$ and $b$.
- Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.
- Derive the equation of a circle given a center and radius using the Pythagorean Theorem; complete the square to find the center and radius of a circle given by an equation.

## 3. Use the Quadratic Formula.

- Use the structure of an expression to identify ways to rewrite it.
- Solve quadratic equations by inspection (e.g., for $x^{2}=49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as a $\pm$ bifor real numbers $a$ and $b$.
- Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.

## NJSLS:

1. NJSLS-G-CO.A.2, NJSLS-G-CO.A.4, NJSLS-G-CO.A. 5
2. NJSLS.A-SSE.A.2, NJSLS.A-REI.B.4b, NJSLS.F-IF.C. $8 a$

NJSLS.N-RN.A.2, NJSLS.G-GPE.A. 1
3. NJSLS.A-SSE.A.2, NJSLS.A-REI.B.4b, NJSLS.F-IF.C. $8 a$, NJSLS.N-RN.A. 2

## Cross-Curricular Standards:

## Realworld problem-solving examples <br> 1. Sports (p. 115)

2. Gravity (p. 126)

Learning Target

1. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
2. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.

## NJSLS:

1. SCI.MS-PS2-2
2. SCI.MS-PS2-2
3. Physical Science (p. 129)
4. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
5. SCI.MS-PS2-2

## The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

21 ${ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills

## Mathematical Practices:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

## Students will engage with the following text:

## Text:

- Algebra 2, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019
- Algebra 1, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019
[Supplement with chapter 8 as needed]

Online Resources incorporated through the year, include but not limited to:

- BigldeasMath.com - publisher on-line assignments, resources and text
- Desmos - online graphing tool
- IXL - web-based software
- G Suite for education - Google Classroom, Docs, Drive, Mail, etc...
- For this chapter students will receive formula sheets to be used at the teacher's discretion on assignments and assessments.

## Calculators:

- TI-84 Plus graphing calculator

## Students will write:

How can you complete the square for a quadratic expression?
How can you derive a general formula for solving a quadratic equation?
Summarize the following methods you have learned for solving quadratic equations: graphing, using square roots, factoring, completing the square, and using the Quadratic Formula.

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Students will uncover and build skills through various classroom learning activities. Investigating algebra activities, modeling examples, using real-life application, using note-taking strategies, and using Smart Board technologies will all be explored as a blend of learning strategies to promote critical thinking, problem solving and performance skills of all learners. Other learning experiences could include alternative lesson openers, math and history applications, problemsolving workshops, interdisciplinary applications and projects.
Suggested warm-up activities, instructional strategies/activities, and assignments:

Supplemental: Simplify Radicals

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups have students simplify perfect square <br> roots |
| :--- | :--- |
| Practice and Apply | Use Kuta Software |
| Resources | Online Dynamic Classroom has all resources <br> available. Review: Practice A and Practice B, <br> Puzzle Time, Student Journal, and Skills Review <br> Handbook Advanced: Enrichment and Extension, <br> Cumulative Review |

### 3.3 Completing the Square:

Supplemental: Simplify Radicals

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource. (Practice factoring the difference of two <br> squares.) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg.116 \# 3-8, 11-16, 25-28, 66, 69 \#55-60 do <br> not use complete the square, use |
|  | Supplemental Text: Prentice Hall Algebra 2 pg. 285 \#13-20, <br> $28 \& 31$ do not use complete the square use $\mathrm{h}=-\mathrm{b} /(2 \mathrm{a})$ and <br> $\mathrm{k}=\mathrm{f}(\mathrm{a})$ |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, <br> Textbook website platform, Desmos, etc... |

### 3.4 Using the Quadratic Formula

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource. (Substitute for a variable and simplify <br> the expression.) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg.127 \# 15-18, 33, 34, 69 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 293 \#1-30 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, warm-up/exit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Geometry curriculum/syllabus at the conclusion of an instructional time period:

- Diagnostic Pre-Test
- Chapter Assessments
- Periodic Benchmark Assessments
- End of Course Assessments
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Performance Assessments:

The following assessments require students to utilize various strands of mathematics:

- Projects
- Performance Tasks
- Homework
- Classwork

Course Number: 033300

PART I: UNIT RATIONALE
WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 Integrated/ <br> Algebra 2 4.1 Graphing <br> Polynomial Functions. 4.8 <br> Analyzing Graphs of <br> Polynomial Functions | Unit Summary: <br> In this unit, polynomial functions are defined and graphed. End behavior of even and odd functions are explored. This chapter is broken up into two sections for assessment in class as it is a long chapter. Graphs of polynomial functions will be explored. Students will be able to analyze graphs to find $x$ - and $y$-intercepts, minimum and maximum values, intervals of increase and decrease, |
| :---: | :---: |
| $\begin{gathered} \text { Grade Level(s): } \\ 11-12 \end{gathered}$ | and domain and range of functions. |
| Essential Question(s): <br> - What are some common characteristics of the graphs of cubic and quartic polynomial functions? <br> - How do the ends of the graphs of polynomial functions behave? <br> - How many turning points can the graph of a polynomial have? | Enduring Understanding(s): <br> Students will be able to: <br> - Identify polynomial functions <br> - graph polynomial functions using tables and end behavior <br> - Use x-intercepts to graph polynomial functions <br> - Identify turning points and identify local maximums and local minimums of graphs of polynomial functions <br> - Identify intervals of increase and decrease <br> - Identify domain and range <br> - Identify $x$-and $y$-intercepts graphically |

## PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES DESCRIBE THE LEARNING TARGETS.

After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

## 1. 4.1 Graphing Polynomial Functions

For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts, intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums, symmetries; end behavior, and periodicity.

Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.

## 2. 4.8 Analyzing Graphs of Polynomial Functions

Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.

For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts, intervals where the function is increasing, decreasing, positive or negative, relative maximums and minimums, symmetries, end behavior, and periodicity.

Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.

- G Suite for education - Google Classroom, Docs, Drive, Mail, etc...
- For this chapter students will receive formula sheets to be used at the teacher's discretion on assignments and assessments.

## Calculators:

- TI-84 Plus graphing calculator

## Students will write:

Explain what is meant by the end behavior of a polynomial function.
Describe three different methods to expand $(x+3) 3$.
Is $(a+b)(a-b)=a 2-b 2$ an identity? Explain your reasoning.

Explain the Remainder Theorem in your own words. Use an example in your explanation.
How do you know when a polynomial is factored completely?
Explain a what a complex conjugate is.
How many solutions does the polynomial equation $(x+8) 3(x-1)=0$ have? Explain.
Explain what a local maximum of a function is and how it may be different from the maximum value of the function

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Students will uncover and build skills through various classroom learning activities. Investigating algebra activities, modeling examples, using real-life application, using note-taking strategies, and using Smart Board technologies will all be explored as a blend of learning strategies to promote critical thinking, problem solving and performance skills of all learners. Other learning experiences could include alternative lesson openers, math and history applications, problem-solving workshops, interdisciplinary applications and projects.
Suggested warm-up activities, instructional strategies/activities, and assignments:

| Warm up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (Evaluate the function for the given value of <br> x.) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg.162 \#1, 3-14, 17-20, 25-31, 48 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 309 \#1- <br> 12 |

# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21^{\text {sT }}$ Century global skills 

Course Name: Algebra 2 Integrated
Course Number: 033300

## PART I: UNIT RATIONALE

## WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?

| Course/Unit Title: <br> Algebra 2 <br> Integrated/Section 3.2 and <br> Chapter 4 Polynomial <br> Functions <br> Grade Level(s): <br> 11-12 | Unit Summary: <br> Students will first be introduced to complex numbers via section 3.2 as this section was skipped when Chapter 3 was completed. Following section 3.2, we will shift into Chapter 4 to complete the remaining sections that have not been covered. Connections to earlier work are usually made easily, as linear and quadratic functions are both polynomial functions. The notation and vocabulary can be overwhelming for students, though some of the vocabulary was used in Algebra 1. Prior work with factoring is extended to third- and fourth-degree expressions. Synthetic division is used to efficiently check for possible rational roots when rewriting polynomials in factored form in order to solve polynomial equations. All of the work with operations on polynomials, factoring, and solving leads to the Fundamental Theorem of Algebra in the middle of the chapter: If $f(x)$ is a polynomial of degree $n$, where $n>0$, then the equation $f(x)=0$ has at least one solution in the set of complex numbers. The corollary to the theorem, namely that an $n$ th-degree polynomial function has exactly $n$ zeros, is the focus of the lesson. |
| :---: | :---: |
| Essential Question(s): <br> - How can you use the factors of a cubic polynomial to solve a division problem involving the polynomial? <br> - How can you factor a polynomial? <br> - How can you determine whether a polynomial equation has a repeated solution? <br> - How can you determine whether a polynomial equation has imaginary solutions? | Enduring Understanding(s): <br> Students will be able to: <br> - Use synthetic division to divide polynomials by binomials of the form $\mathrm{x}-\mathrm{k}$. <br> - Use the Remainder Theorem <br> - Factor polynomials. <br> - Use the Factor Theorem <br> - Find solutions of polynomial equations and zeros of polynomial functions. <br> - Use the Irrational Conjugates Theorem. <br> - Use the Fundamental Theorem of Algebra <br> - Find conjugate pairs of complex zeros of polynomial functions. |

PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES

## DESCRIBE THE LEARNING TARGETS.

## After each target, identify the New Jersey Student Learning Standards that are applicable

## Learning Target

## 1. 4.3 Dividing Polynomials

Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number a, the remainder on division by $x-a$ is $p(a)$, so $p(a)=0$ if and only if $(x-a)$ is a factor $p(x)$.

Rewrite simple rational expressions in different forms; write $a(x) / b(x)$ in the form $q(x)$ $+r(x) / b(x)$, where $a(x), b(x), q(x)$, and $r(x)$ are polynomials with the degree of $r(x)$ less than the degree of $b(x)$, using inspection, long division, or, for the more complicated examples, a computer algebra system.

## 2. 4.4 Factoring Polynomials

Use the structure of an expression to identify ways to rewrite it.

Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number $a$, the remainder on division by $x-a$ is $p(a)=0$ if and only if $(x-a)$ is a factor of $p(x)$.

Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.

## 3. 4.5 Solving Polynomial Equations

Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.

## 4. 4.6 The Fundamental Theorem of Algebra

Extend polynomial identities to the complex numbers.

Know the Fundamental Theorem of Algebra; show that it is true for quadratic polynomials.

Identify zeros of polynomials when suitable factorizations are available and use the zeros to construct a rough graph of the function defined by the polynomial.

NJSLS:

1. NJSLS.A-APR.B.2, NJSLS.A-APR.D. 6
2. NJSLS.A-SSE.A.2, NJSLS.A-APR.B.2, NJSLS.A-APR.B. 3
3. NJSLS.A-APR.B. 3
4. NJSLS.N-CN.C.8, NJSLS.N-CN.C.9, NJSLS.A-APR.B. 3

Cross-Curricular Standards:

## Realworld problem-solving examples <br> 1. Physics (p. 183)

2. Business (p. 195)

Learning Target

1. Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object.
2. Analyze how personal and cultural values impact spending and other financial decisions.

## NJSLS:

1. SCI.MS-PS3-5
2. PFL.9.1.12.A. 9
3. Physics (p. 201)
4. Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object.
5. SCI.MS-PS3-5

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, exit/admit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Algebra 1 curriculum/syllabus at the conclusion of an instructional time period.

- Diagnostic Pre-Test
- Chapter Tests
- Periodic Benchmark Tests
- End-Of -Course Assessment
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Performance Assessments:

The following assessments require students to utilize various strands of mathematics.

- Projects
- Performance Tasks
- Homework
- Classwork

Accommodations/Modifications:
As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

# Black Horse Pike Regional School District Curriculum Template <br> engaging students fostering achievement cultivating $21{ }^{\text {ST }}$ Century global skills 

Course Name: Algebra 2 Integrated
Course Number: 033300

## PART I: UNIT RATIONALE

WHY ARE STUDENTS LEARNING THIS CONTENT AND THESE SKILLS?
\(\left.$$
\begin{array}{|l|l|}\hline \text { Course/Unit Title: } \\
\text { Algebra } 2 \text { Integrated/ } \\
\text { Algebra } 2 \text { Ch 5: } \\
\text { Rational Exponents and } \\
\text { Radical Functions }\end{array}
$$ \quad \begin{array}{l}Unit Summary: <br>
In this unit (Chapter 5) the first part introduces radicals and nth roots <br>
and how these may be written as rational exponents. A connection is <br>
made to the properties of exponents studied in Algebra 1, noting that <br>
now exponents can be rational numbers and are no longer restricted <br>
to being nonzero integers. In the middle portion of the chapter, radical <br>
expressions, also written in rational exponent form, are represented <br>
as functions and are graphed. This leads to a look at what the domains <br>

are for each function type. The graphs of radical functions are used to\end{array}\right\}\)|  |
| :--- | :--- |
| help students think about solutions of radical equations and |
| inequalities. Certainly, one goal is for students to recognize that |
| solving radical equations is an extension of solving other types of |
| functions. The difference, however, is that sometimes extraneous |
| solutions are introduced when solving radical equations, so it is |

```
of exponents to simplify
products and quotients of
radicals?
- How can you identify the
domain and range of a
radical function?
- How can you solve a
radical
equation?
- How can you use the
graphs
of two functions to sketch
the graph of an arithmetic
combination of the two
functions?
- How can you sketch the
graph of the inverse of a
function?
```

- Graph radical functions.
- Write transformations of radical functions.
- Solve equations containing radicals and rational exponents.
- Add, subtract, multiply, and divide functions.
- Find composition of functions.
- Explore inverses of functions.
- Find and verify inverses of nonlinear functions.
- Solve real-life problems using inverse functions.

PART II: INSTRUCTIONAL STRATEGIES AND RESOURCES
DESCRIBE THE LEARNING TARGETS.
After each target, identify the New Jersey Student Learning Standards that are applicable

| Learning Target | NJSLS: |
| :---: | :---: |
| 5.1 nth Roots and Rational Exponents |  |
| - Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. <br> - Rewrite expressions involving radicals and rational exponents using the properties of exponents. | 5.1 <br> NJSLS.N-RN.A.1, NJSLS.N-RN.A. 2 |
| 5.2 Properties of Rational Exponents and Radicals |  |
| - Rewrite expressions involving radicals and rational exponents using the properties of exponents. | 5.2 <br> NJSLS.N-RN.A. 2 |

| 5.3 Graphing Radical Functions |  |
| :--- | :--- |
| - Graph polynomial functions, identifying zeros when suitable factorizations are |  |
| available, and showing end behavior. |  |$\quad$| NJSLS.F-IF.C.7b, |
| :--- |
| NJSLS.F-BF.B.3 |

### 5.4 Solving Radical Equations and Inequalities

- Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method.

## 5.4

NJSLS.A-REI.A.1,
NJSLS.A-REI.A. 2

| 5.5 Performing Function Operations |  |
| :--- | :--- |
|  | 5.5 |
| • Combine standard function types using arithmetic operations. |  |
| $\bullet$ Compose functions | NJSLS.F-BF.A.1b |
|  | NJSLS.f-BF.A.1c |

### 5.6 Inverse of a Function

## 5.6

NJSLS.A-CED.A.4,
NJSLS.F-BF.B.4a

- Solve an equation of the form $f(x)=c$ for a simple function $f$ that has an inverse and write an expression for the inverse.

Cross-Curricular Standards:

Realworld problem-solving examples

1. Physics (p. 254)
2. Aviation (p. 257)
3. Physical Health/Exercise

Learning Target

1. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
2. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.
3. Developing and maintaining wellness requires ongoing evaluation of factors impacting health and modifying lifestyle behaviors accordingly.

## NJSLS:

1. SCI.MS-PS2-2
2. SCI.MS-PS2-2
3. HPE.2.1.12.A.CS1

The following $21^{\text {st }}$ century skills and the 8 mathematical practices are embedded throughout the course and are evident in daily lessons, assignments, activities, assessments and projects:

## 21 ${ }^{\text {st }}$ Century skills:

- Critical thinking
- Creativity
- Collaboration

## Mathematical Practices:

- Make sense of problems and persevere in solving them
- Reason abstractly and quantitatively
- Communication
- Information literacy
- Technology literacy
- Media literacy
- Flexibility
- Leadership
- Initiative
- Productivity
- Social skills
- Construct viable arguments and critique the reasoning of others
- Model with mathematics
- Use appropriate tools strategically
- Attend to precision
- Look for and make use of structure
- Look for and express regularity in repeated reasoning

## Students will engage with the following text:

## Text:

- Algebra 2, A Common Core Curriculum - Big Ideas Math, Big Ideas Learning LLC., 2019

Online Resources incorporated through the year, include but not limited to:

- BigldeasMath.com - publisher on-line assignments, resources and text
- Desmos - online graphing tool
- IXL - web-based software
- G Suite for education - Google Classroom, Docs, Drive, Mail, etc...
- For this chapter students will receive formula sheets to be used at the teacher's discretion on assignments and assessments.

## Calculators:

- TI-84 Plus graphing calculator

Students will write:
Students will explain how you use a rational exponent to represent a power involving a radical.
Students will simplify expressions without using a calculator and explain their reasoning.
Students will describe how they can use properties of exponents to simplify products and quotients of radicals.
Students will explain how to identify the domain and range of a radical function?
Students will describe how the domain and range of a radical function are related to the index of the radical.
Students will describe how they solve a radical equation.
Students will explain why they would prefer to use a graphical, numerical, or analytical approach to solve a given equation.
Students will describe how you can use the graphs of two functions to sketch the graph of an arithmetic combination of the two functions.
Students will explain how to sketch the graph of the inverse of a function.

Students will explain relationships when comparing graphs.

## PART III: TRANSFER OF KNOWLEDGE AND SKILLS

## DESCRIBE THE LEARNING EXPERIENCE.

How will students uncover content and build skills?

Students will uncover and build skills through various classroom learning activities. Investigating algebra activities, modeling examples, using real-life application, using note-taking strategies, and using Smart Board technologies will all be explored as a blend of learning strategies to promote critical thinking, problem solving and performance skills of all learners. Other learning experiences could include alternative lesson openers, math and history applications, problem-solving workshops, interdisciplinary applications and projects. Suggested warm-up activities, instructional strategies/activities, and assignments:

## 5.1 nth Roots and Rational Exponents

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (using properties of integer exponents <br> to simplify expressions) |
| :--- | :--- |
| Practice and Apply | For objectives relating to simplifying expressions with <br> rational exponents teacher should use Kuta or other <br> supplementary materials. <br> Big Ideas Text pg. 241: \#5-10, 21-3135-42, 51-54 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 389 \#1-49 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

### 5.2 Properties of Rational Exponents and Radicals

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (using properties of integer exponents <br> to simplify expressions) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg. 248: \#1-6, 13-16, 37, 41, 42, 44, 49-52, <br> $57,58,63,65,66,82-87$ <br> Supplemental Text: Prentice Hall Algebra 2 pg. 377 \#1-35 <br> and pg382 \#1-12 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

### 5.3 Graphing Radical Functions

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (describe the transformations of the <br> parent function $f(x)=x^{\wedge} 2$ represented by g. |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg. 256: \#1-11, 19, 21, 22, 27, 64 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 417: \#1-8, <br> $12,15,18-21$ |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

### 5.4 Solving Radical Equations and Inequalities

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Use Exploration 1 Solving Radical Equations pg. <br> 261 |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg. 266: \#1-18, 21, 22, 27-32, 35, 36, 58 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 394: \#1-30 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

### 5.5 Performing Function Operations

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (Simplify expressions) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg. 273: \#5, 6, 19, 20, 28-31 <br> Supplement Composition of functions using Kuta Software <br> Supplemental Text: Prentice Hall Algebra 2 pg. 400: \#1-44 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

### 5.6 Inverse of a Function

| Warm-up/Starting Options | Suggestions include but not limited to: <br> Warm-ups are available in the Dynamic Classroom <br> Resource (Solve equations for y) |
| :--- | :--- |
| Practice and Apply | Big Ideas Text pg. 281: \#5 - 8, 13-20, 22, 29, 30, 73-79 <br> Supplemental Text: Prentice Hall Algebra 2 pg. 410: \#1-34 |
| Resources | All resources are available electronically; i.e. Kuta <br> Software, Textbook website platform, Desmos, <br> etc... |

## PART IV: EVIDENCE OF LEARNING

IDENTIFY THE METHODS BY WHICH STUDENTS WILL DEMONSTRATE THEIR UNDERSTANDING OF CONTENT AND THEIR ABILITY TO APPLY SKILLS. IDENTIFY BLOOM'S LEVELS.

Formative Assessments:

The effectiveness of the instructional program will be based on numerous activities and strategies including the following: teacher observations, students collaborating with peers, questioning strategies, student record-keeping, quizzes, warm-up/exit assignments, peer/self-assessments, learning/response logs, discussions and practice presentations.

Summative Assessments:

The following assessments will be used to evaluate student learning, skill acquisition and academic achievement of the Standards of Mathematical Practice and the New Jersey Learning Standards for Mathematics listed under each chapter in the Geometry curriculum/syllabus at the conclusion of an instructional time period:

- Diagnostic Pre-Test
- Chapter Assessments
- Periodic Benchmark Assessments
- End of Course Assessments
- Standardized Tests

## Accommodations/Modifications:

As stated in IEP or 504

- Special Education
- 504 Students
- At Risk Students
- ELL
- Gifted and Talented

## Performance Assessments:

The following assessments require students to utilize various strands of mathematics:

- Projects
- Performance Tasks
- Homework
- Classwork
