**These assessments will mostly require students to Apply, Analyze, Evaluate, and Create.*

Accommodations/Modifications:

Concepts will be learned through a variety of techniques that help the visual, aural, and kinesthetic learner. During assessment, consideration will be taken that each student's learning is individually based on natural ability and prior knowledge of music. The following accommodations and modifications are suggested to assist students from different developmental levels:

- Use visual aids, such as PowerPoint or Prezi presentations, and Smartboard activities.
- Introduce new vocabulary before the lesson.
- Provide help for note-taking, such as giving students lecture outlines or diagrams.
- Provide examples of completed assignments to show students what they are to do.
- Break long assignments into parts, and set separate due dates for each part.
- Read directions aloud; reread or explain the directions of a test if necessary.
- Underline or highlight important words in directions or test items.
- Group questions so that similar kinds of items are together.
- Provide a list of words as answers for fill in the blank questions.
- Allow additional time for assignments, quizzes, and tests.
- Give the test to the student alone or in a small group.
- Allow the student take a test in another room where there are no distractions.
- Arrange preferential seating near area of instruction.
- Pair struggling students with more advanced students for peer mentorship.
- Provide extra, more advanced assignments for students who finish early.
- Offer extra help during individual or small-group lesson periods, during and after school.
- Provide alternate assignments for students who are unable to attend required performances if necessary.
